Agent-Based Modelling in Economics

Description: Agent-based modelling in economics

Lynne Hamill and Nigel Gilbert, Centre for Research in Social Simulation (CRESS), University of Surrey, UK

New methods of economic modelling have been sought as a result of the global economic downturn in 2008. This unique book highlights the benefits of an agent-based modelling (ABM) approach. It demonstrates how ABM can easily handle complexity: heterogeneous people, households and firms interacting dynamically. Unlike traditional methods, ABM does not require people or firms to optimise or economic systems to reach equilibrium. ABM offers a way to link micro foundations directly to the macro situation.

Key features:

- Introduces the concept of agent-based modelling and shows how it differs from existing approaches.
- Provides a theoretical and methodological rationale for using ABM in economics, along with practical advice on how to design and create the models.
- Each chapter starts with a short summary of the relevant economic theory and then shows how to apply ABM.
- Explores both topics covered in basic economics textbooks and current important policy themes; unemployment, exchange rates, banking and environmental issues.
- Describes the models in pseudocode, enabling the reader to develop programs in their chosen language.
- Supported by a website featuring the NetLogo models described in the book.

Agent-Based Modelling in Economics provides students and researchers with the skills to design, implement, and analyze agent-based models. Third year undergraduate, master and doctoral students, faculty and professional economists will find this book an invaluable resource.

Contents:

Preface viii

Copyright notices ix

1 Why agent–based modelling is useful for economists 1

1.1 Introduction 1

1.2 A very brief history of economic modelling 1

1.3 What is ABM? 4

1.4 The three themes of this book 5

1.5 Details of chapters 6

References 9

2 Starting agent–based modelling 11

2.1 Introduction 11

2.2 A simple market: the basic model 12

2.3 The basic framework 13

2.4 Enhancing the basic model: adding prices 18
11.2 The models 234
11.3 What makes a good model? 237
11.4 Pros and cons of ABM 238
