

Electronic health record (EHR) refers to the electronic version of medical charts and other documents that health workers maintain for their patients. In the past two decades, the healthcare industry has witnessed a rapid adoption of EHR systems across healthcare facilities from medium to large-sized hospitals to small-sized medical practices. EHR systems have proven to be effective in improving patient care, increasing patient safety, streamlining work processes at healthcare facilities and reducing treatment time.

This report on the global EHR market offers an insightful and in-depth assessment of the current as well as future market potential of web-based and client server-based EHR systems. The research study has been divided into eight chapters, namely, preface, executive summary, global EHR market overview, global EHR market revenue by installation type, global EHR market revenue by end-user, global EHR market revenue by geography, recommendations and company profiles.

In chapter four, the global EHR market is segmented into web-based EHR and client server-based EHR, based on the two major installation types. The market revenue size in terms of USD million for both segments has been provided in the chapter for the period 2012 to 2020, along with the CAGR for the forecast period 2014 to 2020, considering 2012 and 2013 as the base years. The chapter also provides qualitative analysis for both types of EHR systems.

Chapter five segments the global EHR market into hospitals and ambulatory centers, based on end-users. The market revenue size in terms of USD million for hospitals as well ambulatory centers has been provided for the period 2012 to 2020, along with the CAGR for the forecast period between 2014 and 2020, considering 2012 and 2013 as the base years.

Geographically, the global EHR market has been classified into four major regions, namely, North America, Europe, Asia-Pacific and Rest of the World (RoW). The market size and forecast for each of these regions along with the CAGR has been provided in the report.
