Global Natural Gas Storage Market 2015-2019

Description: About Natural Gas Storage
Natural gas storage involves accumulation of natural gas in several storage facilities for future consumption. The purpose of storage is to meet the fluctuating energy demand during the peak and off-peak seasons. Generally, natural gas is stored during the off-peak season and utilized during the peak season. This reduces the demand and supply gap, and increases the reliability of supply.

The analysts forecast the Global Natural Gas Storage market to grow at a CAGR of 6.02 percent over the period 2014-2019.
