Stretch and Shrink Films Market in the US 2015-2019

Description: About Stretch and Shrink Film
Stretch and shrink films are highly engineered polythene films used for packaging goods. These films have special chemical properties, which make them differ in their flexibility and stretchability. Stretch films are stretchable, elastic thin polythene films used to wrap around pallet loads. Shrink films are thin films that are wrapped around a single product or commodity and require the application of heat for packing. These films help prevent the spoilage of goods from air and moisture, thus enhancing the quality of packaged products.

The analysts forecast the Stretch and Shrink market in the US to grow at a CAGR of 3.76 percent over the period 2014-2019.
