Global Toluene Market 2015-2019

Description:
Toluene, also known as methylbenzene, is an aromatic hydrocarbon, which contains seven carbon and eight hydrogen atoms, and it is represented by the formula C7H8. Toluene is produced during the manufacture of gasoline by naphtha reforming. Reformate accounts for more than 70 percent of the world's toluene production with the rest coming from pygas. It is a clear, colorless liquid with low volatility due to the methyl group in its chemical structure, which also makes it a good octane enhancer for gasoline blending. It finds use in a variety of applications such as raw material for benzene, solvents, xylene, and TDI production, which are further used in numerous industries such as Paint, Adhesive, Chemical, Pharmaceutical, Textile, Polymer, and Plastic.

The analysts forecast the Global Toluene market to grow at a CAGR of 4.2 percent over the period 2014-2019.
