Global ZigBee STB Market 2015-2019

Description:

About ZigBee STBs
ZigBee STBs are equipped with ZigBee RF4CE standard chip, which is used as a replacement for IR technology in remote controls. With the development of multi-protocol ICs, ZigBee technology is also set to allow STBs to become the centerpiece of smart homes. This technology enables advanced remote control functionalities, such as gesture, motion, and touch control, and removes line-of-sight limitations. As the world is moving toward smart homes, ZigBee-enabled STBs will act as a central point that will control all smart devices in a smart home.

The analysts forecast the global ZigBee STB market to grow at a CAGR of 20.89% over the period 2014-2019.
