Brazilian Mining Industry 2015-2019

Description: Outlook of the Brazilian mining industry

The market research analyst predicts the Brazilian mining industry to witness a steady growth at a CAGR of around 5% during the forecast period. The increased demand for minerals globally is driving the growth of this market. Brazil is rich in mineral ores and is one of the chief exporters of minerals. For instance, China is heavily dependent on Brazil for iron ore for its steel production. The growth of the global automobile industry is also creating a demand for various products thereby driving the Brazilian mining industry.

The difficulty in procuring licenses for mining is expected to deter the market growth during the forecast period. Brazil has a very complex regulatory framework for the mining sector. Approval processes and jurisdiction is divided among the federal, state, and municipal governments. Mineral exploration licenses are approved by the DNPM at the federal government level, and development concessions are issued by the MME. The licenses are renewed on the basis of the final exploration report.

Segmentation by minerals and analysis of - aggregates, iron ore, bauxite, and phosphate concentrate

The aggregates segment dominated the market during 2014 with a market share of 54% and is anticipated to witness the fastest growth during the forecast period. The increased demand from the construction sector is driving the growth of this segment. For instance, nearly 10 thousand tons of aggregates is required for paving a road of one kilometer while a 50 square meter low-cost house requires 68 tons of aggregates. Minas Gerais, Sao Paulo, Rio de Janeiro, and Parana are the key regions in Brazil driving the growth of the aggregate segment.

The report offers an analysis of each of the following segments and discusses its impact on the overall market growth -

- Aggregates
- Iron ore
- Bauxite
- Phosphate concentrate

Segmentation by mine and analysis of - micro, small, medium, grand

The micro mine segment accounted for 49% of the market share during 2014. Micro mines produce less than 10 thousand million tons per annum.

The report offers an analysis of each of the following segments and discusses its impact on the overall market growth -

Micro
Small
Medium
Grand

Competitive landscape and key vendors - Vale, MMX, MRN, Alumar, Votorantium

The Brazilian mining industry is witnessing a consolidation with increased competition in the market. The market is also experiencing an increased influx of private labels. The report anticipates the development of innovative methods by the vendors to boost the market growth during the forecast period.

The leading vendors in the market are €”

VALE
MMX Group EBX
Other prominent vendors in the market include Anglo American, AngloGold Ashant, and ArcelorMittal.

Key questions answered in the report include:
- What will the market size and the growth rate be in 2019?
- What are the key factors driving the Brazilian mining industry?
- What are the key market trends impacting the growth of the Brazilian mining industry?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the vendors in the Brazilian mining industry?
- What are the key outcomes of the five forces analysis of the Brazilian mining industry?

PART 04: Introduction
- Key market highlights
- Overview

PART 05: Market landscape
- Brazilian mining industry
- Five forces analysis

PART 06: Market segmentation by minerals
- Brazilian mining industry for aggregates
- Brazilian mining industry for iron ore
- Brazilian mining industry for gold
- Brazilian mining industry for bauxite
- Brazilian mining industry for phosphate concentrate
- Brazilian mining industry for potassium concentrate
- Brazilian mining industry for manganese
- Brazilian mining industry for kaolin
- Brazilian mining industry for copper ore
- Brazilian mining industry for nickel concentrate
- Brazilian mining industry for zinc concentrate
- Brazilian mining industry for niobium
- Brazilian mining industry for tin ore

PART 07: Market segmentation by mine

PART 08: Market drivers
- Increase in demand for minerals from developing economies
- Developing infrastructure
- Increase in investments in mining sector
PART 09: Impact of drivers

PART 10: Market challenges
- Declining iron ore quality
- Difficulties with environmental licensing
- Difficulty in talent retention

PART 11: Impact of drivers and challenges

PART 12: Market trends
- Enhancement of ore quality
- Retention of skilful employees
- Ease in licensing regulations

PART 13: Vendor landscape
- Competitive scenario
- Key market vendors
- Other prominent vendors

PART 14: Key vendor analysis
- Alcoa
- Mineração Rio do Norte
- MMX
- Vale
- Votorantim Metals
