Power Tools Market in the US 2015-2019

Description:

About power tools

Power tools are used to manufacture products with increased convenience and ease. There are different types of power tools such as electric power tools, engine-driven power tools, and pneumatic power tools. Power tools are adopted for different operations such as drilling, screw driving, chiseling, routing, sanding, polishing, buffing, and leveling. Engine-driven power tools use gasoline for their operation, and pneumatic power tools operate with the effective deployment of compressors. These tools are used across industries such as automotive, infrastructure, construction, woodworking, aerospace, and electrical and electronics.

The analysts forecast the power tools market in the US to grow at a CAGR of 4.22% over the period 2015-2019.
