Puerto Rico Pharmaceuticals and Healthcare Report Q3 2015

Description: There has been very little fluctuation in the forecast for Puerto Rico, indicating that the country's trajectory has not changed. With an ageing population, caused by decreased birth rates and an outflow of the country's younger population to the United States, occurrences of chronic diseases are increasing dramatically. However, the government is taking proactive measures to reduce this costly burden in the future, exemplified by the proposal of a 'fat tax' for parents of obese children.

Headline Expenditure Projections
- Pharmaceuticals: USD3.02bn in 2014 to USD2.95bn in 2015; -2.2%. Forecast down compared with Q215.

Contents:
