5.3.1 Overview
5.3.2 Transtel
5.3.3 In 2006 Transtel stated that it was looking at selling off non-core assets as part of a restructuring effort to eventually leave it with only three core business divisions: Railways, harbours and pipelines. The company indicated Transtel may not be sold in its entirety and that the sale would not include the 15% stake in the SNO which is owned directly by Transnet. MTN showed interest, but in June 2006 Neotel paid Transnet ZAR256 million for the 1,300km of intra-city fibre optic cables and other telecommunications equipment and
facilities that Transtel had established as part of its SNO shareholding. Other communication assets of Transtel were transferred to InfraCo (see chapter  

5.3.4 Dark Fibre Africa  
5.3.5 Mobile operators  
5.3.6 Eskom  
5.3.7 In mid-2006 Eskom decided to cut its losses in the telecoms market and made the long-awaited announcement of a divestiture of its 15% interest in the South African SNO as well as its shareholding in the incumbent telco in neighbouring Lesotho. The company was planning to put the 10,000km of fibre optic cable up for sale that it had deployed across the country in preparation for its involvement in the SNO, but the government decided to retain ownership of the infrastructure within InfraCo (see chapter  

5.3.8 Dark Fibre Africa

9. Mobile Communications
9.1 Overview of South Africa's mobile market
9.2 Mobile statistics
9.2.1 General statistics
9.3 The number of mobile phone subscribers in South Africa passed the number of fixed phone lines in 2000 and reached 100% market penetration for the first time in 2008, compared with around 10% fixed-line penetration. However, the country’s mobile subscriber base may be overestimated by as much as 20% in the various statistics available, due to inactive subscribers and multiple SIM cards that many subscribers hold. In addition, the requirement for registration of subscriber details (see chapter REF_Ref279664151 "Interconnection"
9.4 Mobile broadband/data
9.4.1 Mobile data revenue
9.4.2 SMS
9.4.3 MMS
9.5 Forecasts
9.5.1 Forecast – mobile subscribers – 2015, 2018
9.6 South Africa’s mobile market penetration briefly exceeded 100% in 2008, but it may have been overestimated by as much as 20% due to the counting of inactive subscribers and multiple SIM cards that many subscribers hold. The market saw negative subscriber growth in 2009 when legislation became effective requiring the registration of subscriber identification (see chapter REF_Ref279664151 \r \h
