Non-Tyrosine Kinase Inhibitors in Oncology, 2015 - 2025

Description:
Over decades, the oncology market has been led by surgery, chemotherapy and radiotherapy. The non-specificity of chemotherapy/radiotherapy and limitations of surgery has expanded the focus of many pharmaceutical companies to improve these treatments as well as discover novel cancer therapies with minimum toxic effects.

Targeted cancer therapy is an upcoming area gaining strong foothold in the industry and has already become the focus of a number of pharmaceutical companies. Different types of drugs/antibodies and mechanism of actions have been adopted to specifically target the cancer cells. Small molecule protein kinase inhibitors are a type of targeted therapy that involves small molecule drugs administered in the cancer patient for specifically targeting certain proteins, called kinases, involved in the growth of cancer cells. The approach can be broadly subdivided into two drug classes: tyrosine kinase inhibitors and non-tyrosine kinase inhibitors. The market currently is led by the former; however, several drugs are being developed to target non-tyrosine kinases such as mTOR, CDK, MEK and RAF.

In fact, non-tyrosine kinase inhibitors have gradually gained attention in the last few years. Amongst the marketed drugs, Nexavar and Afinitor have already achieved blockbuster status. With several new drugs under development, companies are also evaluating combination therapies of marketed drugs for the approved or additional oncological indications.

Apart from the bigger pharmaceutical companies such as Roche/Genentech, Eli Lilly, Novartis, Pfizer, AstraZeneca, several smaller/ start-up companies have shown their participation in this area. As the industry gains momentum, many companies have already benefitted by adopting the strategy of discovering the compounds and then out-licensing to bigger companies.

The "Non-Tyrosine Kinase Inhibitors in Oncology, 2015-2025" report provides a comprehensive analysis of the current market landscape and the future outlook of kinase inhibitors not specifically targeting tyrosine kinases. These include kinase inhibitors with activity against serine/threonine kinases, dual specificity kinases or both tyrosine and serine/threonine kinases being developed for oncological indications. Targeted therapy, specifically small molecule protein kinase inhibitors, has emerged as the new generation of cancer treatment that specifically targets only cancer cells. Although the market of protein kinase inhibitors is dominated by tyrosine kinase inhibitors, non-tyrosine kinase inhibitors (serine/threonine kinase inhibitors, dual specificity kinase inhibitors and drugs that inhibit both tyrosine and serine/threonine kinases) have gained a significant momentum in the last few years. There are total seven marketed non-tyrosine kinase inhibitors approved so far. Nexavar, the first drug of this type, received approval in 2005. Subsequently, Torisel (2007), Afinitor (2009), Zelboraf (2011), Tafinlar (2013), Mekinist (2013) and Ibrance (2015) were approved. The pipeline is rich and holds a significant potential for future.

Most of the non-tyrosine kinase inhibitors identified during our research target mTOR, CDK, RAF and MEK kinases. In addition, there are several novel non-tyrosine kinase inhibitors under development that target other serine/threonine and dual specificity kinases (e.g. PLK1, ERK, PIM, Chk kinases).

The report covers various aspects such as key players, marketed non-tyrosine kinase inhibitors, products in clinical / pre-clinical research, associated patents, likely future developments and upcoming opportunities for a variety of stakeholders. With the seven marketed drugs and several in late stage of development, the market is expected to grow at a healthy rate in the coming few years. The report elaborates and provides detailed sales forecasts of many promising drugs for the period 2015 - 2025. Owing to the relatively niche nature of the market, we have provided three market forecast scenarios to add robustness to our model. The conservative, base and optimistic scenarios represent three different tracks of industry evolution.

Contents:
1. Preface
   1.1. Scope of the Report
   1.2. Research Methodology
   1.3. Chapter Outlines
2. Executive Summary

3. Cancer Therapeutics and Targeted Cancer Therapy
   3.1. Chapter Overview
   3.2. Cancer Therapy: History of Development
   3.3. Targeted Therapy: Emerging Cancer Treatment
   3.4. Classification of Targeted Cancer Therapy
       3.4.1. By Mechanism of Action
       3.4.2. By Product Class
   3.5. Small Molecule Protein Kinase Inhibitors: Overview
       3.5.1. Introduction to Protein Kinases
       3.5.2. Chemical Activity of Protein Kinases
   3.6. Small Molecule Protein Kinase Inhibitors: Classification by Type of Target Kinases
       3.6.1. Tyrosine Kinase Inhibitors
       3.6.2. Non-Tyrosine Kinase Inhibitors

4. Non-Tyrosine Kinase Inhibitors: Current Market Landscape
   4.1. Chapter Overview
   4.2. Protein Kinase Inhibitors in Oncology: Market Overview
   4.3. Our Focus of Study: Non-Tyrosine Kinase Inhibitors in Oncology
       4.3.1. Seven Approved Non-Tyrosine Kinase Inhibitors in Market
       4.3.2. Clinical and Preclinical Pipeline Drugs
       4.3.3. Non-Tyrosine Kinase Inhibitors: Distribution by Highest Phase of Development
       4.3.4. Non-Tyrosine Kinase Inhibitors: Distribution by Type
       4.3.5. Non-Tyrosine Kinase Inhibitors: Distribution by Target Sites
       4.3.6. Non-Tyrosine Kinase Inhibitors: Distribution by Key Players
   4.4. Future Outlook: Sales Forecast, 2015 - 2025
       4.4.1. Scope and Forecast Methodology
       4.4.2. Overall Market Size and Forecast

5. mTOR Inhibitors: Key Molecules and Future Outlook
   5.1. mTOR Inhibitors: Mechanism of Action
   5.2. mTOR Inhibitors: Market Overview
   5.3. mTOR Inhibitors: Pipeline Analysis
       5.3.1. mTOR Inhibitors: Distribution by Highest Phase of Development
       5.3.2. mTOR Inhibitors: Key Players
   5.4. Torisel / Temsirolimus (Wyeth/Pfizer)
       5.4.1. Introduction
       5.4.2. History of Development
       5.4.3. Orphan Drug Designation
       5.4.4. Dosage Form, Dosing Regime, Pricing
       5.4.5. Manufacturing
       5.4.6. Patent Expiry
       5.4.7. Reimbursement
       5.4.8. Historical Sales
       5.4.9. Current Development Status
       5.4.10. Target Population
       5.4.11. Torisel / Temsirolimus Sales Forecast, 2015 - 2025
   5.5. Afinitor / Votubia / Everolimus (Novartis)
       5.5.1. Introduction
       5.5.2. History of Development
       5.5.3. Orphan Drug Designation
       5.5.4. Dosage Form, Dosing Regime, Pricing
       5.5.5. Manufacturing
       5.5.6. Reimbursement
       5.5.7. Historical Sales
       5.5.8. Current Development Status
       5.5.9. Target Population
       5.5.10. Afinitor / Votubia / Everolimus Sales Forecast, 2015- 2025
   5.6. mTOR Inhibitors

6. Cdk Inhibitors: Key Molecules and Future Outlook
   6.1. CDK Inhibitors: Mechanism of Action
6.2. CDK Inhibitors: Market Overview
6.3. CDK Inhibitors: Pipeline Analysis
6.3.1. CDK Inhibitors: Distribution by Highest Phase of Development
6.3.2. CDK Inhibitors: Key Players
6.4. Ibrance / Palbociclib (Pfizer)
6.4.1. Introduction
6.4.2. Collaboration with Onyx (Amgen)
6.4.3. History of Development
6.4.4. Dosage Form, Dosage Regime, Pricing
6.4.5. Key Clinical Trial Results
6.4.6. Current Development Status
6.4.7. Target Population
6.4.8. Ibrance/Palbociclib Sales Forecast, 2015 - 2025
6.5. Abemaciclib / LY2835219 (Eli Lilly)
6.5.1. Introduction
6.5.2. Key Clinical Trial Results
6.5.2.1. Phase II Study Results
6.5.2.2. Phase I Study Results
6.5.3. Current Development Status
6.5.4. Target Population
6.5.5. Abemaciclib/LY2835219 Sales Forecast, 2017 - 2025
6.6. Ribociclib / LEE011 (Novartis)
6.6.1. Introduction
6.6.2. Collaboration with Astex
6.6.3. Current Development Status
6.6.4. Key Clinical Trial Results
6.6.5. Target Population
6.6.6. Protecting the Breast Cancer Franchise
6.6.7. Ribociclib/ LEE011 Sales Forecast, 2017 - 2025
6.7. CDK Inhibitors

7. RAF / MEK Inhibitors: Key Molecules and Future Outlook
7.1. RAF / MEK Inhibitors: Mechanism of Action
7.2. RAF / MEK Inhibitors: Market Overview
7.3. RAF /MEK Inhibitors: Pipeline Analysis
7.3.1. MAPK/ERK Signaling Pathway Inhibitors: Distribution by Target Kinases (RAF or MEK)
7.3.2. RAF Inhibitors: Distribution by Highest Phase of Development
7.3.3. MEK Inhibitors: Distribution by Highest Phase of Development
7.3.4. RAF/MEK Inhibitors: Key Players
7.4. Nexavar / Sorafenib (Bayer and Onyx)
7.4.1. Introduction
7.4.2. Bayer and Onyx Collaboration
7.4.3. History of Development
7.4.4. Patent Expiry and Litigations
7.4.5. Orphan Drug Designation
7.4.6. Dosage Form, Dosing Regime and Pricing
7.4.7. Historical Sales
7.4.8. Reimbursement
7.4.9. Manufacturing
7.4.10. Current Development Status
7.4.11. Target Population
7.4.12. Nexavar/Sorafenib Sales Forecast, 2015 - 2025
7.5. Zelboraf / Vemurafenib (Daiichi-Sankyo and Roche)
7.5.1. Introduction
7.5.2. History of Development
7.5.3. Orphan Drug Designation
7.5.4. Dosage Form, Dosage Regime and Pricing
7.5.5. Reimbursement
7.5.6. Manufacturing
7.5.7. Historical Sales
7.5.8. Current Development Status
7.5.9. Target Population
7.5.10. Zelboraf /Vemurafenib Sales Forecast, 2015 - 2025
8.3.2. History of Development
8.3.3. Key Clinical Study Data
8.3.4. Current Status of Development
8.3.5. Target Population
8.3.6. Midostaurin / PKC412 / CGP 41251 / CGP 41231 Sales Forecast, 2016 - 2025
8.4. Estybon / Rigosertib (Onconova Therapeutics)
8.4.1. Introduction
8.4.2. Agreement with Baxter
8.4.3. Key Clinical Trial Results
8.4.4. Current Status of Development
8.4.5. Target Population
8.4.6. Estybon / Rigosertib Sales Forecast, 2017 - 2025
8.5. Volasertib / BI 6727 (Boehringer Ingelheim)
8.5.1. Introduction
8.5.2. History of Development
8.5.3. Key Clinical Trial Results
8.5.4. Current Status of Development
8.5.5. Target Population
8.5.6. Volasertib / BI 6727 Sales Forecast, 2016 - 2025
8.6. Novel Non-Tyrosine Kinase Inhibitors
9. Company Profiles
9.1. Roche
9.1.1. Company Overview
9.1.2. Financial Performance
9.1.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.1.4. Collaborations
9.2. Eli Lilly
9.2.1. Company Overview
9.2.2. Financial Performance
9.2.3. Non-Tyrosine Kinase Inhibitor Pipeline
9.2.4. Collaborations
9.3. Novartis
9.3.1. Company Overview
9.3.2. Financial Performance
9.3.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.3.4. Collaborations
9.4. Array BioPharma
9.4.1. Company Overview
9.4.2. Financial Performance
9.4.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.4.4. Collaborations
9.5. Nerviano Medical Sciences
9.5.1. Company Overview
9.5.2. Non-Tyrosine Kinase Inhibitors Pipeline
9.5.3. Collaborations
9.6. Cyclacel Pharmaceuticals
9.6.1. Company Overview
9.6.2. Financial Overview
9.6.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.7. Daiichi Sankyo
9.7.1. Company Overview
9.7.2. Financial Performance
9.7.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.8. Onconova Therapeutics
9.8.1. Company Overview
9.8.2. Financial Performance
9.8.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.8.4. Collaborations
9.9. AstraZeneca
9.9.1. Company Overview
9.9.2. Financial Performance
9.9.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.9.4. Collaborations
9.10. GlaxoSmithKline (GSK)
9.10.1. Company Overview
9.10.2. Financial Performance
9.10.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.10.4. Collaborations
9.11. Pfizer
9.11.1. Company Overview
9.11.2. Financial Performance
9.11.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.11.4. Collaborations
9.12. Merck KGaA
9.12.1. Company Overview
9.12.2. Financial Performance
9.12.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.12.4. Collaborations
9.13. Astex Pharmaceuticals
9.13.1. Company Overview
9.13.2. Financial Performance
9.13.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.13.4. Collaborations
9.14.2. Financial Overview
9.14.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.15. Celgene Corporation
9.15.1. Company Overview
9.15.2. Financial Performance
9.15.3. Non-Tyrosine Kinase Inhibitors Pipeline
9.16. Eternity Bioscience
9.16.1. Company Overview
9.16.2. Non-Tyrosine Kinase Inhibitors Pipeline
9.17. Jasco Pharmaceuticals
9.17.1. Company Overview
9.17.2. Non-Tyrosine Kinase Inhibitors Pipeline
9.17.3. Collaborations

10. Interview Transcripts
10.1 Interview 1: Joseph R. Garlich, Chief Scientific Officer, SignalRx Pharmaceuticals
10.2 Interview 2: Gregory J. Mossinghoff, Chief Business Officer, G1 Therapeutics
10.3 Interview 3: Christopher C. LeMasters, Chief Business Officer, Tragara Pharmaceuticals

11. Conclusion
11.1. A New Generation of Cancer Treatment with Broad Therapeutic Window
11.2. mTOR, CDK, RAF, MEK Kinases are the Most Common Non-Tyrosine Kinases Being Targeted
11.3. Combination Therapies Likely To Be The Key To Future Success
11.4. Overall Opportunity is Big; We Project a 9% Growth in Our ‘Base’ Scenario
11.5. Concluding Remarks

12. Appendix 1: Tabulated Data

13. Appendix 2: List of Companies and Organizations

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/3203534/](http://www.researchandmarkets.com/reports/3203534/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit
http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

Product Name: Non-Tyrosine Kinase Inhibitors in Oncology, 2015 - 2025
Web Address: http://www.researchandmarkets.com/reports/3203534/
Office Code: SCH3ZA9J

Product Formats
Please select the product formats and quantity you require:
