Global Security Services Market 2015-2019

Description: About Security Services

Security services focus on the security of key parameters such as data protection, compliance, architecture, email and web security, governance, data loss prevention, and identity and access. They provide features such as encryption, endpoint monitoring, identity and access management, intrusion detection, vulnerability scanning, and application and messaging security. They are gaining importance among large enterprises, government organizations, and SMEs because they provide protection to critical business information from unauthorized access and data theft. In addition, they protect computer systems from malware, worms, and other sophisticated threats.

The analysts forecast the global security services market to grow at a CAGR of 10.13% over the period 2014-2019.
