PESTLE Analysis of Ireland 2015

Description: Background:
Ireland's economy is dominated by the service sector, which contributed approximately 72% to the total GDP in 2014. The country went through the global recession in 2009, but strong fundamentals have led the country to survive the crisis. Mining and quarrying makes the major contribution to GDP at 25.9%. Ireland presents strong investment opportunities in IT business and computer hardware. Ireland is one of the leading exporters of IT business services and computer hardware across the world. Information technology is the leading industry in Ireland.

The author has analyzed the political, economic, social, technological, legal, and environmental factors of Ireland and has come up with a comprehensive research report, “PESTLE Analysis of Ireland 2015”. This report provides an analysis of Ireland's economy from historical, current, and future perspectives. SWOT analysis, scenario analysis, and risk analysis of Ireland are also included in the report. The report also includes forecast of the economic growth through 2020.

The report highlights various drivers and challenges which have influenced investment decisions in the economy. Ireland is a politically stable country and a parliamentary representative democratic republic. Ireland is a net exporter country, and it mainly exports commercial IT services, chemical, and pharmaceutical products. Ireland's economic growth is mainly driven by exports, but the country also imports some such products as mineral fuels, oil, and machineries. Ireland is intensively involved in foreign trade. Huge investment opportunities lie in sectors such as organized retail, healthcare, education, residential housing, and banking and financial. Demographic dividend acts as a strength for Ireland's population which was 4.3 billion in 2014. The country's young population is approximately 55.4% of the total population, leading to a high domestic demand. The country, however, is facing challenges, such as high debt risk.
