K-12 Education Market in GCC 2015-2019

Description: About K-12 Education in GCC

Education plays an essential role in the development of GCC economies as it helps in creating skilled workforce. The governments in the GCC region are lending tremendous support to the education sector. Dependency on immigrant population has substantially increased labor costs and also reduced employment opportunities for native citizens. As a result, to reduce dependency on expats and to diversify from oil-based revenues, almost all countries have begun to invest heavily on education to strengthen their knowledge base. The revenue from oil has provided sufficient funds to improve the education system and develop academically and technically qualified individuals who are able to serve their country for its progress.

The analysts forecast the K-12 education market in GCC to grow at a CAGR of 3.03% in terms of student enrollments over the period 2014-2019.
