Power Tools Market in APAC 2015-2019

Description:
About Power Tools

Power tools facilitate increased ease and convenience to manufacture products. Engine-driven power tools, electric power tools, and pneumatic power tools are the major types of power tools available in the market. Engine-driven power tools use gasoline for their operation, whereas pneumatic power tools operate with the effective deployment of compressors. Power tools are used for several operations such as screwdriving, drilling, chiseling, planing, routing, sanding, buffing, polishing, and leveling. In addition to their application in the residential sector, these tools are adopted by several companies across industries such as automotive, infrastructure, construction, woodworking, aerospace, and electrical and electronics.

The analysts forecast the power tools market in APAC to grow at a CAGR of 5.03% over the period 2015-2019.
