Global Uranium Mining to 2020

Description: The ‘Global Uranium Mining to 2020’ report comprehensively covers global identified resources of uranium, reasonably assured resources by country, the historical and forecast data on global uranium mine production, planned and committed mine expansions and production by country, production by mining method and production by major mines. The report also includes demand drivers affecting the global uranium mining industry, profiles of major uranium producing companies and information on the global major active, exploration and development projects by region.

Summary:

Global uranium mine production according to Timetric’s global uranium report was 56,184 tonnes (t) in 2014, down by 5.4% compared with 2013, with Kazakhstan being the leading producer, followed by Canada and Australia.

Scope:

The report provides information on the global uranium mining industry together with the key demand drivers affecting the industry. Further, it provides information about reserves, historic and forecast production and production by country, production by mining method and production by major mines, competitive landscape and major active, exploration and development projects.

Reasons To Buy:

Gain an understanding of the global uranium mining industry, the relevant demand drivers, reserves, historic and forecast production, production by major country, production by mining method and production by major mines, active, exploration and development projects and the competitive landscape.

Key Highlights:

- Global uranium mine (or metal content in the ore) production was 56,184t in 2014, down by 5.4% compared with 2013.

- The increase in global production in recent years is mainly due to an increase in output from Kazakhstan.

- With power generation being a significant end use for uranium, the Fukushima nuclear power plant accident has had an impact on long term nuclear power policies in Germany, Belgium, France and Switzerland, switching in favor of capping and eventually phasing out nuclear power plants. However, there is demand for nuclear capacities from other parts of the world, and demand has a unique regional footprint.

Contents:

1 Executive Summary
2 Global Uranium Mining – Reserves, Production, Consumption and Trade
   2.1 Reserves and Resources by Country and Type of Ore
      2.1.1 Recoverable Resources by Country
   2.2 Historical and Forecast Production
      2.2.1 Total production by country
      2.2.2 Total production by mining method
      2.2.3 Production by major mines
   2.3 Major Active Mines
   2.4 Major Exploration and Development Projects
   2.5 Total Uranium Consumption vs Nuclear Power Generation by Country
   2.6 Demand Drivers
      2.6.1 Global demand for uranium for nuclear power generation
   3 Major Uranium Producers
      3.1 National Atomic Company Kazatomprom
      3.2 Cameco Corporation
Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

| Product Name:  | Global Uranium Mining to 2020 |

Payment Information
Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
