Global IT Security Consulting Services Market 2015-2019

Description: About Global IT Security Consulting Services

Over the years, enterprises worldwide have become increasingly dependent on technology and internet to run their business and drive revenue growth. This trend is expected to intensify, which means the role of IT departments has become vital and directly contributes to the organization's agenda.

IT integration departments are ensuring measures and upgrades to smoothen their IT and business operations. As such, one of the key responsibilities of every CIO is to provide an integrated infrastructure that is agile, resilient, and secure, while keeping a closer eye on costs.

In the last few years, there have been several high-profile security threats and attacks on organizations. While these were spread across various countries, industry verticals, and business segments, the single common trait among them was the fact that the companies involved had underestimated the importance of secure IT infrastructure. As a result, the consequences were not only severe from a financial standpoint, but in most cases were very public, putting the organization's goodwill and reputation at stake.

The analysts forecast the global IT security consulting service market to grow at a CAGR of 7.02% over the period 2014-2019.
