Global In-vehicle Entertainment and Information Systems Market 2015-2019

Description:

About in-vehicle entertainment and information systems

Conventional in-vehicle entertainment systems consisted of radio, cassettes, and CDs. The advances in technology and growing demand for personalized entertainment, navigation, and connectivity have redefined these systems. In-vehicle entertainment and information systems are a combination of software and hardware devices installed in automobiles that provide audio and video content. These systems are embedded with in-vehicle navigation devices, internet and Wi-Fi connectivity, audio and video systems, display screens, and telematics systems.

The analysts forecast the global in-vehicle entertainment and information systems market to grow at a CAGR of 14.82% over the period 2014-2019.
