UAE Patient Registry Software Market Forecast and Opportunities, 2020

Description: According to "UAE Patient Registry Software Market Forecast & Opportunities, 2020", the market for patient registry in the UAE is projected to grow at over 14% through 2020. The country's booming healthcare sector is projected to buoy growth in the patient registry market over the next five years. Demand for patient registry software is mainly emanating from government agencies, third party administrators, research institutes and multispecialty hospitals. The software is being increasingly adopted by research institutes and pharmaceutical companies as well to analyze impact of medicines and treatment procedures. Presently, Diabetic patient registry segment accounts for the largest market share, followed by Cardiovascular, Cancer and Chronic patient registry segments.

Increasing government concerns over medical services provided in the UAE coupled with rising incidences of diseases such as diabetes, cancer, etc., are escalating the demand for advanced solutions that help analyze cause, impact and treatment availed during the course of the disease. This has given rise to adoption of patient registry software, which is an organized system that collects data and evaluates data of patients suffering from particular disease and also facilitates evaluation of clinical procedure conducted. Growing adoption of Electronic Health Records (EHRs) are making a significant contribution towards the growth of patient registry market in the UAE. Patient registry software finds applications in government organizations, hospitals, private practitioners and pharmaceutical companies. The patient registry in the country has been segmented based on registry types including diabetics, cancer, cardiovascular and chronic diseases.
