Global Industrial Control Valves Market 2015-2019

Description:

About Industrial Control Valves

Industrial control valves are devices that are used to regulate the flow of fluids and gases. They are also used to regulate pressure within the system. Control valves monitor flow, temperature, and pressure by utilizing signals and partially or fully open or close as per the requirement. Sensors provide changes in conditions which are then compared to a set point.

The analysts forecast the global industrial control valves market to grow at a CAGR of 6.52% over the period 2014-2019.
