Global Heparin Market 2015-2019

Description: About Heparin

Heparin is an anticoagulant or blood thinner produced by basophils and mast cells. Though it has no effect on already formed clots, it enables the body’s natural clot lysis mechanisms to function and dissolve clots. A porcine intestine or bovine lungs extract of heparin is used pharmaceutically in conditions such as DVT, pulmonary embolism, acute coronary syndrome, and atrial fibrillation to prevent clots. It is also used during surgeries to prevent clot formation.

The analysts forecast the global heparin market to grow at a CAGR of -4.80% over the period 2014-2019.
