Global Medical Waste Management Market 2015-2019

Description: About Medical Waste Management

Healthcare waste includes waste generated within healthcare facilities such as hospitals, research centers, and laboratories related to medical procedures. It includes waste generated from minor sources such as self-administration of insulin, home dialysis, and recuperative care. Medical waste management is essential to protect the general public, environment, workers, especially sanitation and healthcare workers, who are at high risk of exposure to medical waste as an occupational hazard. The medical waste management involves various steps such as generation, accumulation, storage, handling, transport, treatment, and disposal.

The analysts forecast the global medical waste management market to grow at a CAGR of 5.35% over the period 2014-2019.

Covered in this Report

This report covers the present scenario and the growth prospects of the global medical waste management market for the period 2015–2019. The market can be divided into two segments based on medical waste generation sources: large quantity generators and small quantity generators. To calculate the market size, the report considers the revenue generated from the two waste generation sources.
