South Africa Pharmaceuticals and Healthcare Report Q3 2015

Description: Improvements to South Africa’s pharmaceutical supply chain will result in fewer drug shortages, making the country a more attractive destination for local manufacturing. Inequalities will still persist between states, with further drug shortages more likely in rural areas given the underdeveloped health systems in these parts of the country.

Headline Expenditure Projections
- Pharmaceuticals: ZAR39.79bn (USD3.67bn) in 2014 to ZAR44.12bn (USD3.62bn) in 2015; +10.9% in local currency terms and -1.4% in US dollar terms.
