Li-on Battery Market for E-Bike in China 2015-2019

Description:

About Li-ion Battery for E-bikes

E-bikes are integrated with a small electric motor and rechargeable li-ion battery. The small electric motor (dynamo), powered by a li-ion battery, is mounted on the rear wheel of e-bike, which produces a steady current to propel the e-bike engine and ultimately its wheels. A typical e-bike can travel up to 16-20 mph, depending on the rules and regulations of the country in which it is traded.

The analysts forecast the li-ion battery market for e-bikes in China to grow at a CAGR of 30% over the period 2014-2019.
