A Practical Approach to Dynamical Systems for Engineers

Description:
A Practical Approach to Dynamical Systems for Engineers takes the abstract mathematical concepts behind dynamical systems and applies them to real-world systems, such as a car traveling down the road, the ripples caused by throwing a pebble into a pond, and a clock pendulum swinging back and forth.

Many relevant topics are covered, including modeling systems using differential equations, transfer functions, state-space representation, Hamiltonian systems, stability and equilibrium, and nonlinear system characteristics with examples including chaos, bifurcation, and limit cycles.

In addition, MATLAB is used extensively to show how the analysis methods are applied to the examples. It is assumed readers will have an understanding of calculus, differential equations, linear algebra, and an interest in mechanical and electrical dynamical systems.

- Presents applications in engineering to show the adoption of dynamical system analytical methods
- Provides examples on the dynamics of automobiles, aircraft, and human balance, among others, with an emphasis on physical engineering systems
- MATLAB and Simulink are used throughout to apply the analysis methods and illustrate the ideas
- Offers in-depth discussions of every abstract concept, described in an intuitive manner, and illustrated using practical examples, bridging the gap between theory and practice
- Ideal resource for practicing engineers who need to understand background theory and how to apply it

Contents:
Introduction: What is a Dynamical System?
System Modeling
Hamiltonian Systems
Characteristics of Dynamical Systems
Characteristics of Nonlinear Systems

Ordering:
Order Online - http://www.researchandmarkets.com/reports/3329131/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

- Product Name: A Practical Approach to Dynamical Systems for Engineers
- Web Address: http://www.researchandmarkets.com/reports/3329131/
- Office Code: SCPLYNAD

Product Format
Please select the product format and quantity you require:

- Quantity
  - Hard Copy (Hard Back): [ ] USD 161 + USD 28 Shipping/Handling

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

- Title: [ ] Mr [ ] Mrs [ ] Dr [ ] Miss [ ] Ms [ ] Prof
- First Name: __________________________
- Last Name: __________________________
- Email Address: * __________________________
- Job Title: __________________________
- Organisation: __________________________
- Address: __________________________
- City: __________________________
- Postal / Zip Code: __________________________
- Country: __________________________
- Phone Number: __________________________
- Fax Number: __________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
