Thermal Physics

Description: In Thermal Physics: Thermodynamics and Statistical Mechanics for Scientists and Engineers, the fundamental laws of thermodynamics are stated precisely as postulates and subsequently connected to historical context and developed mathematically. These laws are applied systematically to topics such as phase equilibria, chemical reactions, external forces, fluid-fluid surfaces and interfaces, and anisotropic crystal-fluid interfaces.

Statistical mechanics is presented in the context of information theory to quantify entropy, followed by development of the most important ensembles: microcanonical, canonical, and grand canonical. A unified treatment of ideal classical, Fermi, and Bose gases is presented, including Bose condensation, degenerate Fermi gases, and classical gases with internal structure. Additional topics include paramagnetism, adsorption on dilute sites, point defects in crystals, thermal aspects of intrinsic and extrinsic semiconductors, density matrix formalism, the Ising model, and an introduction to Monte Carlo simulation.

Throughout the book, problems are posed and solved to illustrate specific results and problem-solving techniques.

- Includes applications of interest to physicists, physical chemists, and materials scientists, as well as materials, chemical, and mechanical engineers
- Suitable as a textbook for advanced undergraduates, graduate students, and practicing researchers
- Develops content systematically with increasing order of complexity
- Self-contained, including nine appendices to handle necessary background and technical details

Contents:

Preface

Part I: Thermodynamics
1. Introduction
2. First Law of Thermodynamics
3. Second Law of Thermodynamics
4. Third Law of Thermodynamics
5. Open Systems
6. Equilibrium and Thermodynamic Potentials
7. Requirements for Stability
8. Monocomponent Phase Equilibrium
9. Two-Phase Equilibrium for a van der Waals Fluid
10. Binary Solutions
11. External Forces and Rotating Coordinate Systems
12. Chemical Reactions
13. Thermodynamics of Fluid-Fluid Interfaces
14. Thermodynamics of Solid-Fluid Interfaces

Part II: Statistical Mechanics
15. Entropy and Information Theory
16. Microcanonical Ensemble
17. Classical Microcanonical Ensemble
18. Distinguishable Particles with Negligible Interaction Energies
19. Canonical Ensemble
20. Classical Canonical Ensemble
21. Grand Canonical Ensemble
22. Entropy for Any Ensemble
23. Unified Treatment of Ideal Fermi, Bose and Classical Gases
24. Bose Condensation
25. Degenerate Fermi Gas
26. Quantum Statistics
27. Ising Model

Part III: Appendices
A. Stirling's Approximation
B. Use of Jacobians to Convert Partial Derivatives
C. Differential Geometry of Surfaces
D. Equilibrium of Two-State Systems
E. Aspects of Canonical Transformations
F. Rotation of Rigid Bodies
G. Thermodynamic Perturbation Theory
H. Selected Mathematical Relations
I. Creation and Annihilation Operators

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/3329207/](http://www.researchandmarkets.com/reports/3329207/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Thermal Physics
Web Address: http://www.researchandmarkets.com/reports/3329207/
Office Code: SCH3BVC9

Product Format
Please select the product format and quantity you require:

<table>

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:

Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:

- Account number: 833 130 83
- Sort code: 98-53-30
- Swift code: ULSBIE2D
- IBAN number: IE78ULSB98533083313083
- Bank Address: Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
