Boundary Value Problems for Systems of Differential, Difference and Fractional Equations

Description: Boundary Value Problems for Systems of Differential, Difference and Fractional Equations: Positive Solutions discusses the concept of a differential equation that brings together a set of additional constraints called the boundary conditions.

As boundary value problems arise in several branches of math given the fact that any physical differential equation will have them, this book will provide a timely presentation on the topic. Problems involving the wave equation, such as the determination of normal modes, are often stated as boundary value problems.

To be useful in applications, a boundary value problem should be well posed. This means that given the input to the problem there exists a unique solution, which depends continuously on the input. Much theoretical work in the field of partial differential equations is devoted to proving that boundary value problems arising from scientific and engineering applications are in fact well-posed.

- Explains the systems of second order and higher orders differential equations with integral and multi-point boundary conditions
- Discusses second order difference equations with multi-point boundary conditions
- Introduces Riemann-Liouville fractional differential equations with uncoupled and coupled integral boundary conditions

Contents:

1. Systems of second-order ordinary differential equations with integral boundary conditions
2. Systems of higher-order ordinary differential equations with multipoint boundary conditions
3. Systems of second-order difference equations with multipoint boundary conditions
4. Systems of Riemann-Liouville fractional differential equations with uncoupled integral boundary conditions
5. Systems of Riemann-Liouville fractional differential equations with coupled integral boundary conditions

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
