U.S. General Anesthesia Drugs Market by Molecule, route of administration, Supply Chain, Competitive - Analysis Forecast to 2020

Description: "U.S. General Anesthesia Drugs Market by Molecule (Propofol, Benzodiazepines, ketamine(s(+)-ketamine HCl), Methohexital Sodium), route of administration (Intravenous, Inhalational), Supply Chain (GPOs, Distributors), Competitive - Analysis Forecast to 2020"

The U.S. general anesthesia drugs market is poised to reach USD 2.0 Billion by 2020 from USD 1.6 Billion in 2015, at a CAGR of 3.8% from 2015 to 2020.

In this report, the U.S. general anesthesia drugs market is segmented on the basis of molecule and route of administration. On the basis of molecules, the market is divided into Propofol, Benzodiazepine, Ketamine (S-(+)-Ketamine HCL), and Methohexital Sodium. Propofol is expected to be fastest-growing segment, owing to its greater preference and rapid onset of action.

On the basis of route of administration, the U.S. general anesthesia drugs market is bifurcated into intravenous and inhalational. The intravenous segment is expected to account for the largest share of the market in 2015. Greater patient compliance and less number of side effects as compared to inhalational anesthetics are driving the growth of this market.

Growth of the U.S. general anesthesia drugs market is propelled by the rapid rise in aging population, rising prevalence of cardiovascular and respiratory system-related diseases, and rising number of emergency surgeries. However, side effects associated with ketamine usage (such as elevation in blood pressure and heart rate, amnesia, respiratory depression, and hallucinations), regulatory issues, and lower compliance rates in comparison with other anesthetic drugs are likely to restrain the growth of this market.

Key players operating in the U.S. general anesthesia drugs market are AstraZeneca plc (U.K.), Baxter International Inc. (U.S.), Hikma Pharmaceuticals PLC (U.K.), Mylan N.V. (U.S.), Eisai Co., Ltd. (Japan), Fresenius Se & Co. KGaA (Germany), Hospira, Inc. (U.S.), and Par Pharmaceutical Companies, Inc. (U.S.).

Market Segmentation

The report segments the U.S. general anesthesia drugs market into the following segments:

By Route of Administration
- Intravenous
- Inhalational

By Molecule
- Propofol
- Benzodiazepine (Midazolam and Diazepam)
- Ketamine (Esketamine hydrochloride or S-(+)-Ketamine hydrochloride)
- Methohexital Sodium
