Oilfield Drilling Fluid Additives Market: Fluid Viscosifiers (Cellulosics, Others) Corrosion Inhibitors (Oxides, Others) Dispersants (Ionic, Non Ionic) Biocides (Glutaraldehyde, Others) By Defoamers; By Formulation - Forecast (2015 - 2020)

Description:
Oilfield drilling fluids are used in a very extensive manner in the oil and field industry and have proven to be a very crucial part of the oil drilling process. Drilling fluids are a key requirement in the vast majority of drilling operations. The main functions performed by drilling fluids are to: provide a barrier for well control; remove cuttings from the well bore as they are produced; maintain drill cuttings in suspension when drilling circulation is stopped; transmit hydraulic power to the drilling bit; maintain formation stability; maintain pressure on the formation; control fluid loss through filtration; cool and lubricate the drill bit and string; and facilitate data logging—drilling fluids characteristics need to be controlled so that logging instruments can accurately provide information about the well and formations being drilled.

The market is segmented in to various types, fluid formation along with detailed geographic analysis. The global oilfield drilling fluids market was $xx million for the year 2014 and is forecast to reach $ xx million by 2020 exhibiting a CAGR of xx. The market volume of oilfield drilling fluids is estimated to be xx KT by 2020 and poised to exhibit a CAGR of xx % through the period 2014 and 2020.

Amidst the continuation of plunging oil prices, there is a favourable cognizance of improvement in the demand for oil. According to the monthly oil market report June 2015 of OPEC, the global oil demand is seen growing for the year 2015. The demand for oil in 2015 is forecast to grow by xx mb/day (million barrels per day), as compared to xx mb/day in 2014. On the whole an increase in oil demand would in turn induce the growth of biocides market.

On the contrary, the supply of oil has not come down and is projected to grow by xx mb/day, according to OPEC. This in return has created a supply over demand ratio, which has induced the ceasing of many new oil wells. The U.S. which is one of the major markets for shale gas fracking has recently undergone the shutdown of approximately 200 new wells in a period of one year from 2014 to 2015. This has apparently, resulted in a humongous dip in the usage of drilling fluids, as they find their major application in oil field wells. But according to OPEC and other OECD countries this trend will not continue for long and the prices are forecast to recover soon, which consequently, would enhance the production of oil. On the whole, an increase in oil demand would in turn induce the growth of drilling fluid additives market.

Fluid viscosifiers hold the largest market share both in terms of volume and revenue, accounting $ xx million revenue and xx KT in terms of volume. As shown in the above figure, in terms of number of products, fluid viscosifiers had dominated the market with a share of xx %, followed by corrosion inhibitors which accounted for xx % share. BASF, Dow Chemicals, Akzo Nobel and Chevron are some of the major suppliers of fluid viscosifiers. The number of fluid viscosifiers products manufactured is more in number and at the same time the market share in terms of revenue also the highest when compared to others, with a market share of xx %, which is followed by defoamers. The main reason attributed to the highest share of fluid viscosifiers is their price, which is far less than its peers. Easy accessibility and lower price makes it the product with highest usage.

Growth in the industry is not uniform across the regions as; developed regions like Europe and North America are estimated to exhibit sluggish growth compared to other parts of the world. On the contrary, APAC and the Middle East are poised to exhibit faster growth due to the favourable macroeconomic factors and strong demand for oil. China, Saudi Arabia, UAE and Russia are the growth frontiers for the oilfield drilling fluid additives manufacturers, providing a huge market to be tapped. Saudi Arabia is estimated to grow at a CAGR of xx % during the forecast period between 2015 and 2020. China's vast demand for energy will continue to drive the country's exploration and development of its significant unconventional resource potential, with a particular emphasis on natural gas, and hence increasing the additives market.

The oilfield drilling fluid additives market is highly competitive due to the dominance of regional players.

The key players in the market are:
AkzoNobel,
BASF,
Chevron Philips Chemical Company,
Lubrizol
The Dow Chemical Company (constitutes a major share)

These companies are adopting various growth strategies such as new product launches, expansions, partnerships and acquisitions to consolidate their market share. The companies are investing in R&D extensively to develop technically advanced unique products to differentiate from competitors and increase their market share.

Contents:
1. Market Overview
   1.1. Introduction
   1.2. Classification
      1.2.1. By Type
         1.2.1.1. Fluid Viscosifiers
         1.2.1.2. Corrosion Inhibitors
         1.2.1.3. Dispersants
            1.2.1.3.1. Ionic
            1.2.1.3.2. non Ionic
         1.2.1.4. Surface Modifiers
         1.2.1.5. Defoamers
            1.2.1.5.1. Water
            1.2.1.5.2. Oil
            1.2.1.5.3. Silicone
            1.2.1.5.4. Polymer
            1.2.1.5.5. Alkyl Polyacrylates
            1.2.1.6. Biocides
         1.2.1.7. Glutaraldehyde
         1.2.1.8. Chlorine
         1.2.1.9. Tetrakis Hydroxymethyl Phosphonium Sulfate (THPS)
         1.2.1.10. Others
      1.2.2. By Fluid Formulation
         1.2.2.1. Water Based
         1.2.2.2. Oil Based
         1.2.2.3. Synthetic Based
      1.2.3. By Region
         1.2.3.1. North America
         1.2.3.2. Europe
         1.2.3.3. APAC
         1.2.3.4. The Middle-East
         1.2.3.5. Row
      1.2.4. Stakeholders
   2. Executive Summary
   3. Oilfield Drilling Fluid Additives - Market Landscape
      3.1. Market Share Analysis
      3.2. Product Bench-Marking
      3.3. Top 5. Financial Analysis
   4. Oilfield Drilling Fluids-Market Forces
      4.1. Driving Factors
         4.1.1. Budding Fracking Operations in China and Rest of the World
         4.1.2. Booming Crude Oil Production to Drive Global Demand for Oilfield Drilling Fluids
         4.1.3. Growing Interest in Bio Based Oilfield Drilling Fluids to Propel Market Growth
         4.1.4. Increase of Co2. Oil Recovery Technology to Fuel Market for Oilfield Drilling Fluids
      4.2. Challenges
         4.2.1. Environmental Concerns Pose Challenge to the Industry and Restrain Market Growth
      4.3. Restraints
         4.3.1. Plunge In Shale Gas Operations In The U.S.
         4.3.2. Introduction of TOUGAS Technology in China: A New Innovation for Fracking
      4.4. Attractiveness of Oilfield Drilling Fluids Market
         4.4.1. Bargaining Power of Suppliers
4.4.2. Bargaining Power of Customers
4.4.3. Threat of New Entrants
4.4.4. Threat of Substitution
4.4.5. Degree of Competition
5. Oilfield Drilling Fluid Additives Market- Strategic Analysis
5.1. Value Chain Analysis
5.2. Pricing Analysis
5.3. Opportunities Analysis
5.3.1. Russia and North America to Be Potential Huge Markets Due to Increased Exploration Activities
5.4. Industry Life Cycle Analysis
5.5. Suppliers & Distributors
6. Oilfield Drilling Fluid Additives Market: by Fluid Formulation
6.1. Introduction
6.2. Water Based
6.2.1. Water-Based Fluids Are Used To Drill More Than 60% of All Wells
6.3. Oil Based
6.3.1. Shale Inhibition is one of The Key Benefits of Using an Oil-Based System
6.4. Synthetic Based
6.4.1. Due To High Biodegradability and Low Toxicity, Esters are Universally Recognized as the Best Base Fluid for Environmental Performance
7. Oilfield Drilling Fluid Additives Market- by Type
7.1. Introduction
7.2. Fluid Viscosifiers
7.2.1. Barite and Specially-Treated Organophilic Bentonite are Primary Viscosifiers in Most Oil-Based Systems
7.3. Corrosion Inhibitors
7.4. Dispersants
7.4.1. Ionic
7.4.2. Non Ionic
7.5. Surface Modifiers
7.6. Defoamers
7.6.1. Water Based
7.6.2. Oil Based
7.6.3. Silicone Based
7.6.4. Polymer Based
7.6.5. Alkyl Polycrylates Based
7.7. Biocides
7.7.1. Gluteraldehyde
7.7.2. Chlorine
7.7.3. Tetrakis Hydroxymethyl Phosphonium Sulfate (THPS)
7.7.4. Others
8. Oilfield Drilling Fluid Additives Market-By Geography
8.1. Introduction
8.2. North America
8.2.1. U.S.
8.2.1.1. The Top Oil Refinery in the U.S. Is at Port Arthur With a Production Capacity of 600, 250. Barrels per Calendar Day
8.2.2. Canada
8.2.2.1. According To BP Statistical Review, Canada Was Able to Produce 7.9% More In 2014. as Compared To 2013.
8.2.3. Mexico
8.3. Europe
8.3.1. Russia
8.3.1.1. Russian Energy Ministry Forecasts the Reduction of 2% in Their Oil Production for the Coming Years
8.3.2. U.K.
8.3.3. France
8.3.4. Rest of Europe
8.3.4.1. Norway
8.3.4.1.1. Though Struggling With the Rampant Affect of Low Crude Oil Prices, Norway Would Be Back With the Production of Oil by 2019.
8.4. Asia-Pacific (APAC)
8.4.1. China
8.4.1.1. China Aims to Produce 6.5. Billion Cubic Meters of Shale Gas Annually By 2015, With a Recent
Investment of $2.5 Billion

8.4.2. India
8.4.2.1. A Holistic Shale Gas Policy is needed by India, Which Positively Incorporate the Lessons from The Past Where Countries Became Victims of Their own Success.

8.5. The Middle-East
8.5.1. Saudi Arabia

8.6. Row
8.6.1. Brazil
8.6.2. Africa

9. Company Profiles
9.1. AES Drilling Fluid, LLC
9.2. Chevron Phillips Chemical Company, LLC
9.3. CP KELCO U.S., Inc.
9.4. AKZONOBEL N.V.
9.5. Ashland Inc.
9.6. Cargill Inc.
9.7. CHEMIPHASE Ltd
9.8. BASF Se
9.9. CLARIANT Ag
9.10. Georgia-Pacific Chemicals LLC
9.11. IMERYS Oilfield Solutions
9.13. CRODA International PLC
9.14. E. I. Du Pont De Nemours And Company
9.15. Oilfield Chemical Company
9.16. Westrock Company
9.17. The Lubrizol Corporation
9.18. The Dow Chemical Company
9.19. Stepan Company
9.20. Mineral Technologies

10. Appendix
10.1. Acronyms
10.2. Research Methodology

Ordering:
Order Online - [http://www.researchandmarkets.com/reports/3339418/](http://www.researchandmarkets.com/reports/3339418/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

Product Name: Oilfield Drilling Fluid Additives Market: Fluid Viscosifiers (Cellulosics, Others) Corrosion Inhibitors (Oxides, Others) Dispersants (Ionic, Non Ionic) Biocides (Glutaraldehyde, Others) By Defoamers; By Formulation - Forecast (2015 - 2020)
Web Address: http://www.researchandmarkets.com/reports/3339418/ Office Code: SCBRVJBY

Product Formats

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
