Iron Ore Mining in Sweden to 2020

Description: Sweden has moderate amounts of iron ore reserves and other minerals, including copper, lead, zinc, gold, silver and tungsten. The country's iron ore reserves were 3.5 billion tonnes (Bnt) at the end of 2014, ranking ninth globally and representing 1.9% of the global total. The reserves are found mostly in the provinces of Norrbotten, Uppland, and Dalarna.

Summary: The 'Iron Ore Mining in Sweden to 2020' report comprehensively covers Swedish reserves of iron ore by grade, the historic and forecast data on iron ore production and prices, historic and forecast iron ore consumption and exports, exports by country and ports.

The report also includes factors affecting demand for Swedish iron ore, profiles of major iron ore producing companies and information on the active, exploration and development iron ore projects.

The Fiscal Regime section provides information about the country's regulatory authority, laws, licenses and other fiscal regime information such as taxes, rates and other charges applicable to the mining of the commodity in the country.

It is an essential tool for companies active in Sweden mining and for new competitors considering entering the industry.

Scope: The report contains an overview of the Swedish iron ore mining industry, together with the key factors affecting the industry and demand for the commodity.

It also provides information about Swedish reserves, historic and forecast data on iron ore production, consumption and exports, the competitive landscape and active, exploration and development iron ore projects.

Reasons To Buy: Gain an understanding of the coal mining industry in Sweden, coal reserves, historic and forecast data on coal production, coal prices, consumption and exports, demand drivers, active, exploration and development coal projects, the competitive landscape and the country's fiscal regime.

Key Highlights:
- In 2014, Sweden was the 11th-largest global producer of iron ore and the third-largest producer in Europe after Russia and Ukraine with production of 28.1 million tonnes (Mt).
- Luossavaara-Kiirunavaara Aktiebolag (LKAB) is Sweden's largest iron ore producer, accounting for 94.1% of total production in 2014.
- Sweden's mining industry is governed by the Geological Survey of Sweden (Sveriges Geologiska Undersökning) and the Mining Inspectorate of Sweden (Bergsstaten). The Mineral Act (1991:45) is the law that regulates mining activities in the country.
