High Performance Foam Market by Type (Polyurethane, Silicone, Polyolefin, Others), by End Use Industry (Construction, Transportation, Electronics, Packaging, Others), & by Region (Asia-Pacific, Europe, North America, RoW) - Global Forecast to 2020

Description: The global high performance foam market has witnessed a good growth in the past few years and this growth is estimated to increase in the coming years. High performance foam has certain unique properties such as excellent recoverability from repeated shocks and deformations and ability to maintain dimensional stability after getting exposed to shock, impact, and extreme temperature. Because of these physical characteristics, the demand for high performance foam is growing and is finding application in various industries.

The global high performance foam market is experiencing good growth and is expected to continue so in the near future. This growth is mainly driven by the fast growing demand in Asia-Pacific and RoW regions. The major share of the total high performance foam market demand was consumed by the transportation industry in 2014. The drivers of the high performance foam are increase in demand from end user industry such as automobile, construction, electronics, and others from emerging countries such as China, India, and Brazil.

This study basically aims to estimate the global market size for high performance foam for 2015 and project its demand by 2020. This market research study provides a detailed qualitative and quantitative analysis of the global high performance foam market. Various secondary sources such as directories, industry journals, and databases have been used to identify and collect information useful for this extensive commercial study of the high performance foam market. The primary sources that include experts from related industries and suppliers have been interviewed to obtain and verify critical information as well as to assess the future prospects of the market.

Competitive scenarios of the top players in the high performance foam market have been discussed in detail. The leading players in this industry have been comprehensively profiled and their recent developments and other strategic industry activities have been identified and analyzed. The key high performance foam manufacturers profiled in this report includes Rogers Corporation (U.S.), JSP Corporation (Japan), Evonik Corporation (Germany), BASF SE (Germany), The Dow Chemical Company (U.S.), Armacell (Germany), Zotefoams PLC (U.K.), Trocellan (Germany), Sekisui Alveo (Switzerland), SABIC (Saudi Arabia), Saint Gobain (Paris), Solvay (Belgium) and other local players.

Scope of the Report

This research report categorizes the global high performance foam market on the basis of type, end use industry, and region.

In order to provide an all-round picture, the current market demand and forecasts have also been included. The report is categorized as per the segments given below:

On the basis of type:
- Polyurethane foam
- Silicone foam
- Polyolefin foam
- Others

On the basis of end use industry:
- Construction
- Transportation
- Electronics
- Packaging
- Others

On the basis of region:

- North America
- Europe
- Asia-Pacific
- RoW

The market is further analyzed for the key countries in each of these regions.
