Global Chloroprene Rubber (CR) Market 2015-2019

Description:
About Chloroprene Rubber
Chloroprene rubber (CR) is an artificial polymer, which acts as an elastomer. Elastomers can experience significantly greater elastic deformation under anxiety and recovers its previous size without permanent deformation. CR has great mechanical quality, high ozone and weather resistance, great aging resistance, low flammability, great resistance toward chemicals, moderate oil and fuel resistance and adhesion to many substrates. It plays a central role in the global economy, with major applications in the automotive, manufacturing, consumer goods, and medical industries. The automotive industry alone accounts for the majority of the share in 2014 and is the primary driver of changes in year-on-year consumption.

The author forecasts the global chloroprene rubber market to grow at a CAGR of 5.89% and 6.36% on the basis of production and consumption, over the period 2014-2019.
