Global Carbon Management Software Market 2015-2019

Description:
About Carbon Management Software
Carbon management software is a tool that aids organizations in planning and implementing their carbon management strategies. Carbon management tools help organizations accurately measure and reduce their carbon footprints, meet their objectives of corporate sustainability, and fulfill government mandates. The increasing amount of GHG emissions is a major concern for many organizations across the globe. Among the various harmful GHGs, CO2 is one of the most harmful, and it requires considerable effort, such as measuring and monitoring its levels, to reduce its emission. It helps measure, plan, manage, store, and report carbon emissions related to various organizational activities.

The analysts forecast the global carbon management software market to grow at a CAGR of 32.50% over the period 2014-2019.
