Global Managed Security Services Market 2015-2019

Description: About Managed Security Services
Managed security services refer to services outsourced to third-party providers for maintaining information and network security. MSSPs offer managed anti-virus; security monitoring; network boundary protection that includes managed services for firewalls, IDS, and VPN; content filtering; information security risk assessments; incident management including vulnerability assessment and penetration testing; emergency response and forensic analysis; and data archiving and restoration services. In addition, some MSSPs offer periodic vulnerability testing, patching, and escalation services. MSSPs handle managed security services from an off-site location or set up necessary infrastructure on-site to enable organizations to manage their own security.

The analysts forecast the global managed security services market to grow at a CAGR of 11.30% over the period 2014-2019.
