Global Industry Insight: Neem Extract Market Development and Demand Forecast to 2020

Description: The neem extract in the report refer to oils, pastes, powders, cakes and other related products obtained through leaves, seeds, fruits and barks of the neem tree.

The report excludes the finished neem products such as fertilizers, pesticides, and personal and animal care products.

The global neem extract market is booming due to the growing interest of people towards bio-based products. Neem extract is an import-led market, mostly dependent on exports from the Asian countries such as India. The key importers from India are U.S., Vietnam, North Korea, Spain, and Italy.

Many of the Asia-Pacific countries such as China, India, and Philippines use large amount of bio-based fertilizers made from crop and animal waste. However, neem based fertilizers and pesticides account for a small portion of the total agro-supplements in many of the countries in the region. With a vast access to neem plantation in the region coupled with growing awareness of people about the benefits of neem in agriculture and livestock feeding, these countries lay significant opportunities for neem extract market in the medium and long term.

Brazil and China have observed neem as a highly beneficial tree which is leading them to invest in its plantations. While China has already started investing in neem plantations, Brazil is looking for private sector investors for the same. This not only hints at their domestic neem extract consumption growth but also provides increasing opportunities for its international trade. With Brazil becoming one of the exporter, the import of neem extract by certain countries (such as North America) is expected to increase in the long run.

The increasing concern of people and regulatory authorities towards harmful effects of chemical-based fertilizers and pesticides on human health has been compelling the farmers to use bio-based farm products. This has led to a significant increase in the demand for bio-based fertilizers and pesticides. Following the effect, the demand of neem extract based fertilizers and pesticides are also escalating. The demand for organic food has also been increasing in the recent past, especially in Europe, wherein people are preferring products with organic label due to which retailers are increasing the percentage of organic products in their shelves.

With the growing awareness among people towards the harmful effects of chemical based cosmetics on skin, hair and other body parts, the significance of neem based products have risen to a considerable extent. About two decades ago, the ayurvedic medicines in India had been constantly losing its market to allopathic medicines. However, campaigns and advertisements by the domestic ayurvedic companies in the country, such as Patanjali, the ayurvedic medicines have started to rejuvenate. The medicinal benefits of neem are well known in Asia-Pacific and its awareness is percolating to other parts of the globe. With the passage of time, the western countries are increasingly turning towards herbal products for personal care. A large range of neem based cosmetic and personal care products including bathing soap, face cream, face wash and shampoos are now being used in the North American and the European countries.

The bio-based animal farming has increased during the past few years owing to increasing demand for meat obtained from biologically grown animals. Neem leaves and neem seed cake are used as animal feed that contain proteins, amino acids, carotene and minerals. Animals such as camel, goat, sheep and crossbred lambs are fed with neem leaves during winters, a part of their daily feed, as they increase productivity of these animals during the season. Neem is also well known as an effective pest repellent for pet animals. The increasing population of pet animals globally and people's growing concern for the safety of their pets has encouraged neem oil manufacturing.

The neem extract market is highly fragmented with very small-sized players who do not have a fix channel for international sales, except online marketplace.

Major Competitors: Some of the major competitors in the market include E.I.D-Parry (India) Limited, P.J. Margo Pvt. Ltd., Neeming Australia Pty Ltd., Agro Extract Limited, Ozone Biotech Pvt. Ltd., GreeNeem Agri
Private Ltd., Fortune Biotech Ltd., Parker India Group, The Indian Neem Tree Company, and Bros India Group.

Key findings of Neem Extract Market:

- The neem extract market is export-driven, where large percentage of the needs are catered by a small group of countries
- Neem extract market is expected to witness significant growth in agriculture segment, especially bio-pesticides during the forecast period
- The European market is expected to be the key growth driver for neem extract market during the forecast period
- Brazil and Spain are expected to generate significant demand for neem extract during 2014-2020

Report Coverage

- Provides comprehensive understanding of the market with the help of informed market outlook, opportunities, challenges, trends, size and growth, competitive analysis, major competitors and Porter analysis
-Identifies the key drivers of growth and challenges of the key industry players. Also, assesses the future impact of the propellants and restraints on the market
- Uncovers potential demands in the market
- Porter analysis identifies competitive forces within the market
- Provides information on the historical and current market size and the future potential of the market
- Provides sizes of key regional markets using yardsticks of segments, applications, and segments of applications
- Highlights the competitive scenario of the market, major competitors, and benchmarking
- Provides profiles of major competitors of the market including details of their operations, product and services, recent developments and key financial metrics. Profiles provide better understanding of competition as well as the demands of the market.

Contents:

1 Research Scope and Methodology
1.1 Market Definition
1.2 Market Scope
1.3 Research Methodology and Sources

2 Executive Summary
2.1 Key Findings
2.2 Research Summary
2.3 Global neem extract market snapshot(2015 and 2020)

3 Market Outlook
3.1 Introduction
3.1.1 Value chain analysis
3.2 Opportunities in the Market
3.2.1 Vast opportunities lying for the neem extract market in Asia-Pacific countries in the form of fertilizers and pesticides
3.2.2 Brazil and China's investment in neem plantation hold great opportunity for the neem extract market
3.3 Factors Driving the Market and its Impact on Market Forecast
3.3.1 Increasing demand for bio-based fertilizers and pesticides in agriculture is driving the neem extract market
3.3.2 Neem extract market is escalating due to increasing demand for herbal personal care products
3.3.3 The increasing usage of bio-based feedstock in livestock and pest repellents for pets is encouraging the growth of neem extract market
3.3.4 Impact analysis of drivers on market forecast
3.4 Factors Hindering the Market and its Impact on Market Forecast
3.4.1 Low concentration of neem plantation in western countries is limiting global consumption of neem extract
3.4.2 Certain health-related side effects are negatively impacting the consumers mindset about neem-product consumption
3.4.3 Impact analysis of restraints on market forecast

4 Global Market Size and Forecasts (2010 - 2020)
8.4 Agro Extract Limited
8.4.1 Business overview
8.4.2 Product and service offerings
8.5 Ozone Biotech Pvt Ltd
8.5.1 Business overview
8.5.2 Product and service offerings
8.6 GreeNeem Agri Private Limited
8.6.1 Business overview
8.6.2 Product and service offerings
8.7 Fortune Biotech Ltd.
8.7.1 Business overview
8.7.2 Product and service offerings
8.8 Parker India Group
8.8.1 Business overview
8.8.2 Products and services offerings
8.9 The Indian Neem Tree Company
8.9.1 Business overview
8.9.2 Product and service offerings
8.10 Bros India Group
8.10.1 Business overview
8.10.2 Product and service offerings
