
Description: About HEMS
A HEMS allows homeowners to monitor and reduce the energy consumption of electrical and electronic devices at home and hence to conserve energy. With HEMS, energy consumption can easily be monitored by using cellphones, tablets, or other communicating devices. It can also help in power management by tracking real-time energy consumption and comparing it with the historical data of many electronic devices. HEMS helps in improving the communication between communications devices and consumer. HEMS includes five products that are used to manage and reduce the consumption of energy of a home: lighting controls, self-monitoring systems and services, programmable communicating thermostats, intelligent HVAC controllers, and advanced central controllers.

The analysts forecast the global HEMS market to grow at a CAGR of 26.8% over the period 2014-2019.

Covered in this report
This report covers the present scenario and the growth prospects of the global HEMS market for the period 2015-2019.

The report, Global HEMS Market 2015-2019, has been prepared based on an in-depth market analysis with inputs from industry experts. A detailed study of the geographical segmentation (the Americas, APAC, and EMEA) and the revenue and growth patterns of the market are provided in this report. The report presents the vendor landscape and a corresponding detailed analysis of the five major vendors in the market.

Key vendors
- Cisco Systems
- GE Energy Management
- Honeywell International
- Panasonic
- Schneider Electric

Other prominent vendors
- Allure Energy
- C3 Energy
- Hitachi
- Invensys Controls
- Toshiba

Market driver
- Growing need for energy conservation
- For a full, detailed list, view our report

Market challenge
- High initial costs
