Mobile LBS Market in Southeast Asia 2015-2019

Description:
About Mobile LBS
LBS uses the positioning capabilities of wireless applications to deliver innovative services to mobile device users. LBS offers a cost-effective engagement with these users. LBS uses GIS technology and the internet to track a user's location. The various location-enabled mobile devices are smartphones, tablets, PNDs, and devices fitted in vehicles. The key features of LBS include real-time directions, friend finders, location-based social networking, real-time tracking, location-based advertising, discovering places, and location-induced searches. It also generates information regarding ongoing local events, shopping, and location-based entertainment options.

The analysts forecast mobile LBS market in Southeast Asia market to grow at a CAGR of 62.12% over the period 2014-2019.

Covered in this Report
