Global School ERP Market 2015-2019

Description: School ERP software solutions
ERP software refers to business management solutions that enable organizations to integrate business operations, such as product planning, product development, manufacturing processes, inventory control, and distribution for optimal management. ERP software catering to the needs and requirements of schools has attracted the attention of the education sector. Various modules of ERP software can be purchased as stand-alone offerings or as embedded offerings. Each of these modules pertain to operational functions, such as accounts, HR, fees, transportation, examinations, and attendance. Thus, the software helps streamline organization-wide data extracted from various departments. This can help schools improve their performance and internal functioning by automating tasks and activities that streamline work processes.

The analysts forecast the global school ERP market to grow at a CAGR of 13.67% over the period 2014-2019.

Covered in this report
This report covers the current scenario and the growth prospects of the global school ERP market for the period 2015-2019.
