India Oleochemicals Market Forecast and Opportunities, 2020

Description: According to "India Oleochemicals Market Forecast & Opportunities, 2020", oleochemicals market in India is projected to witness growth at a CAGR of over 5% during 2015 - 2020. Easy access to raw materials, cost effectiveness and growing inclination towards greener chemicals are the major factors fueling market growth. Oleochemicals are segmented into four categories - fatty acids, glycerin, fatty alcohols, and others. In 2014, fatty acids dominated oleochemicals market in India, accounting for the largest volume share, followed by glycerin, fatty alcohols and others, respectively. The oleochemicals market in India consists of a large number of global as well as domestic manufacturers. Leading players operating in the country's oleochemicals market include VVF (India), Godrej Industries Limited, 3F Industries Limited, and Jocil Limited, among others.

Over the last decade, rapid depletion of non-renewable resources and stringent government policies and regulations regarding environment protection in India, have resulted in boosting demand for sustainable and biodegradable products, consequently, boosting use of oleochemicals as a preferred substitute for petroleum based products. Oleochemicals are chemicals produced directly or indirectly from natural sources like oils and fats procured from vegetables or animals, and are generally less toxic compared to petrochemicals. On account of a wide range of end-use applications, the consumption of oleochemicals has been witnessing consistent growth in India over the last five years. Majority of the demand for oleochemicals in the country emanates from soap, detergent, personal care, pharmaceutical, and food & beverage industries in the country.
