Methylene Chloride Market by Application (Paint Remover, Pharmaceuticals, Chemical Processing, Foam Manufacturing, Metal Cleaning, & Others), and Geography (North America, Europe, Asia-Pacific, & Row) - Global Forecast to 2020

Description: The methylene chloride market, along with its end products, has witnessed a stagnant growth from the past few years, and it is expected to be the same in the coming years, especially in North American and European regions. Strategies adopted by the leading manufacturers to balance the current supply-demand issues, regulations across different regions, and development of newer applications across the vertical industries will be the key influencing factors in the methylene chloride market. The industry is expected to emphasize on different types and applications of methylene chloride, which is expected to significantly drive the demand in the next five years.

The market is experiencing high growth in Asia-Pacific and RoW regions due to minimal regulations and their mounting industrial growth in the end-use industry. The large population, increased number of end users, and improving infrastructure can be other parameters for the rising demand of methylene chloride. The region is further expected to show an improved growth in the future, mainly due to high growth potential of the pharmaceuticals, foam manufacturing, and chemical processing industries in developing countries such as China, India, South East Asia, and Japan. The Asia-Pacific region accounted for more than 76% of the global market share in terms of volume in 2014.
