
Description: The health conscious consumer sees nutrition enabled foods as an alternative to healthcare costs and thus has been rising the global nutraceutical market. The fastest growing segment in the food sector is the pet food industry which is driven by increasing number of people adopting pets and consumer attitudinal change towards pets with interest on their nutrition and health. The global pet food market with a growing CAGR of 4.5% is estimated to be valued at $86.3 billion by 2020. The pet food industry accounts only 12% towards value based foods with rest accounted for general consumption.

Increasing urbanization, growing disposable incomes, and changing lifestyles have led to lower birth rates and increasing rates of single person families. This is leading to consideration of pets as family members and a number of households owning dogs, cats and other animals. Thus, driving the pet food market and consumers preference for nutrition enabled pet food further growing the pet food nutraceutical market. Other major drivers include companies adopting channel specific product development. This is explained by the increasing number of households owning small and larger animals, where brands are created for the age specific group and this category wise product development is a reason for uptick in demand. The trend of consumers enriching the pets foods with functional ingredients such as vitamins, minerals, probiotics for boosting their pets joints health, coat and heart health are an indication for expected growth in the pet nutraceutical market.

The type of pets owned around the world varies. Based on type, Pets are categorized as Dogs, Cats, Birds and Others. Dogs and Cats are accounted to be the most adopted pets globally. Pet foods are rapidly increasing due to their demand coming from the veterinary use as dietary supplements and for their therapeutic use. The key therapeutic application include pain relief, weight management, digestive health, Immune system, eye care, food allergies and others. Based on the Ingredient type, the pet nutraceutical market is segmented as Omega 3 fatty acids, probiotics, proteins and peptides, plant based enzymes, antioxidants among others. The popular ingredients include Glucosamine, Omega fatty acids, and Probiotics, along with trendier ingredients such as Bee pollen, Green tea, and elk velvet antler. The demand is driven largely by age related diseases in pets like joints deterioration and cognitive dysfunction.

In the Pet food market Asia posted a growth of 3.2% in 2013. Customers from China, Taiwan and Thailand with their increasing levels of pet humanization perceive pet food as quick and easy solution to provide nutrition to their pets. This drives the demand for pet food nutraceutical in these markets. High percentage of US households recorded high numbers in small dogs when compared to medium and large dogs. The retail sales for pet supplements and nutraceutical treats recorded $1.3 billion in US. Japan is a matured market in this category and sees flat sales. The emerging economies are seeing high demand in the branded pet food category thus driving the branding strategies of pet food manufacturers.

The leading players in this market are Diana group, DSM, BASF, Merial, Nutraceutical International LLC and Kemin. The application areas of these companies are in the area of Digestive health, weight management and beauty (coat and skin). In spite of growing pet population, the companies are seeing stagnant revenues. Hence it is important for the companies to focus on segment wise production of nutritional foods. The major constraint the market sees in the regulatory environment. The Functional pet foods manufacturers claims for the nutritional supplements and therapeutic functioning as drugs do not seem to comply with the drug regulations and the regulatory body is overlooking the claims. The need of the hour is the stringent regulatory guidelines to protect the pet health. Bringing awareness among the veterinary community will help in prescribing the right supplements for the animal health.

In this report we offer,

Market analysis for the Global Pet Nutraceuticals Market, with region specific assessments and competition analysis on global and regional scales
Market definition along with the identification of key drivers and restraints
Identification of factors instrumental in changing the market scenarios, rising prospective opportunities, and identification of key companies that can influence this market on a global and regional scale
Extensively researched competitive landscape section with profiles of major companies along with their
Identification and analysis of the macro and micro factors that affect the Global Pet Nutraceuticals market on both global and regional scales
A comprehensive list of key market players along with the analysis of their current strategic interests and key financial information
A wide-ranging knowledge and insights about the major players in this industry and the key strategies adopted by them to sustain and grow in the studied market
Insights on the major countries/regions in which this industry is blooming and to also identify the regions that are still untapped

Please note: As this product is updated at the time of order, dispatch will be 72 hours from the date the order and full payment is received.

Contents:

1. Introduction
   1.1 Research methodology
   1.2 Market Definition
   1.3 Report Description

2. Key Findings

3. Market Overview
   3.1 Introduction
   3.2 Market Dynamics
   3.3 Drivers
      3.3.1 Industrialization of livestock industry
      3.3.2 Expansion of animal meat market
      3.3.3 Changing demographics in Asia-Pacific and South America
      3.3.4 Livestock disease outbreak fuelling additive market
   3.4 Restraints
      3.4.1 Competition for raw materials with other industries
      3.4.2 Price volatility of Agri-commodities
      3.4.3 Regulatory Framework
   3.5 Opportunities
      3.5.1 Increasing demand in Asia-Pacific Markets
      3.5.2 Rise in the cost of natural feeds
   3.6 Porter's Five Forces Analysis
      3.6.1 Bargaining power of Suppliers
      3.6.2 Bargaining power of Buyers
      3.6.3 Degree of Competition
      3.6.4 Threat of Substitution
3.6.5 Threat of new entrants

4. Market Segmentation

4.1 Feed Minerals Market, by Types

4.1.1 Micro Minerals

4.1.2 Macro Minerals

4.2 Feed Minerals Market, by Animal type

4.2.1 Ruminant

4.2.2 Poultry

4.2.3 Swine

4.2.4 Aquaculture

4.2.5 Pets

4.2.6 Horses

4.2.7 Others

4.3 Feed Minerals Market, by Geography

4.3.1 North America

4.3.1.1 US

4.3.1.2 Mexico

4.3.1.3 Canada

4.3.1.4 Others

4.3.2 Europe

4.3.2.1 Spain

4.3.2.2 UK

4.3.2.3 Germany

4.3.2.4 France

4.3.2.5 Russia

4.3.2.6 Italy

4.3.2.7 Others

4.3.3 Asia Pacific

4.3.3.1 China

4.3.3.2 India

4.3.3.3 Japan
4.3.3.4 Thailand
4.3.3.5 Australia
4.3.3.6 Others
4.3.4 South America
4.3.4.1 Brazil
4.3.4.2 Argentina
4.3.4.3 Others
4.3.5 Middle East
4.3.5.1 Saudi Arabia
4.3.5.2 Dubai
4.3.5.3 Others
4.3.6 Africa
4.3.6.1 South Africa
4.3.6.2 Egypt
4.3.6.3 Others

5. Competitive Landscape Overview
5.1 Market Share Analysis
5.2 Strategies by leading players
5.3 New Product Developments & Other Innovations

6. Company Profiles
6.1 Alltech Inc.
6.2 Archer Daniels Midland Co.
6.3 Bio Multimin Inc.
6.4 Biochem Lohne Germany
6.5 Cargill Inc.
6.6 Davidsons Animal Feeds
6.7 Kemin Industries Inc.
6.8 Mercer Milling Co. Inc.
6.9 Novus International Inc.
6.10 Nutreco NV
6.11 Pancosma SA
6.12 Phibro Animal Health Corp.
6.13 QualiTech Corp.
6.14 Ridley Inc.
6.15 Royal DSM NV
6.16 Tanke Biosciences Corp.
6.17 Vamso Biotec Pvt. Ltd.
6.18 Zinpro Corp.
