Russia Water Enhancer Market-Growth, Trends and Forecast (2016 - 2021)

Description:

Despite its low size and share of the overall EU market, Russia is a powerful and growing market. The market here projected to grow at a CAGR of 12.8% and culminate into a $35.9 million industry by 2020. The recent import sanctions imposed on the nation due to the Ukraine crisis is a major constraint for largely west driven enhancer market.

Due to its relatively late embrace of the market forces, Russia is characterized by a very complex and diverse business landscape. This high regional diversity requires a multi-pronged entry strategy and extensive partnership with regional public relations and marketing agencies; the recent import ban amplifies the importance of such partnerships. The large scale pollution of the regions acts as a driver for bottled water sales, thereby providing a point of access to the enhancer products. The other important feature of the region is the high level of urbanization, with nearly three quarters of the population living in Moscow and St. Petersburg. Considering that use of water enhancers is a mostly urban phenomenon, this fact considerably helps the market.

The nation is also witnessing the growing strength of educated, more market oriented and consumption oriented middle class which are expected to drive the demand for such products. These demographic groups are also more focused on health and overall wellness, the zero-calorie and zero-sugar status of the enhancers makes them well placed for the consumer pattern.
