Global Contact Lens Market 2015-2019

Description:

Contact lenses are vision correction devices worn directly on the cornea to rectify conditions such as myopia (nearsightedness), hyperopia (farsightedness), astigmatism (blurred vision because of the shape of the cornea), and presbyopia (inability to see things that are near). Contact lenses are used for corrective purposes, therapeutic purposes, and cosmetic purposes. Depending on the material used and the design, they can be categorized into spherical contact lenses, multifocal contact lenses, toric contact lenses, and other contact lenses.

The global contact lens market is one of the fastest growing ophthalmology markets. The Americas account for the largest share of the market, followed by Europe and APAC. Although the majority of market growth comes from the corrective lens segment, the therapeutic lens and cosmetic lens segments are expected to make a significant contribution to the overall revenue in the near future, especially in developing countries such as China and India.

The analysts forecast the global contact lens market to grow at a CAGR of 10.43% over the period 2014-2019.
