
Description:
About exterior architectural coatings
Coatings are products used to protect a surface and/or enhance its appearance. Architectural coatings are applied to commercial and residential buildings. They protect a building from moisture, UV radiation, and microbes. Paints, primers, lacquers, varnishes, and stains are some of the primary types of architectural coating products. These are formulated using resins such as acrylic, alkyds, polyester, and polyurethane. The market can be broadly classified into two major types of coating technologies: solvent-borne and water-borne.

Over the years, innovations in the exterior architectural coatings market has led to the introduction of eco-friendly products and products with functional benefits. Today, customized wood coatings are graffiti resistant and have self-cleaning properties.

The report forecasts the global exterior architectural coatings market to grow at a CAGR of 5.58% over the period 2014-2019.

Covered in this report
The global exterior architectural coatings market can be segmented into two: water-borne and solvent-borne.

The report, Global Exterior Architectural Coatings Market 2014-2019, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers EMEA, APAC, and the Americas; it also covers the global exterior architectural coatings market landscape and its growth prospects in the coming years. The report also includes a discussion on the key vendors operating in this market.
