Undersea Fiber Communication Systems. Edition No. 2

Description: Since publication of the 1st edition in 2002, there has been a deep evolution of the global communication network with the entry of submarine cables in the Terabit era. Thanks to optical technologies, the transmission on a single fiber can achieve 1 billion simultaneous phone calls across the ocean!

Modern submarine optical cables are fueling the global internet backbone, surpassing by far all alternative techniques. This new edition of Undersea Fiber Communication Systems provides a detailed explanation of all technical aspects of undersea communications systems, with an emphasis on the most recent breakthroughs of optical submarine cable technologies. This fully updated new edition is the best resource for demystifying enabling optical technologies, equipment, operations, up to marine installations, and is an essential reference for those in contact with this field.

Each chapter of the book is written by key experts of their domain. The book assembles in a complementary way the contributions of authors from key suppliers acting in the domain, such as Alcatel-Lucent, Ciena, NEC, TE-Subcom, Xtera, from consultant and operators such as Axiom, OSI, Orange, and from University and organization references such as TelecomParisTech, and Suboptic.

This has ensured that the overall topics of submarine telecommunications is treated in a quite ecumenical, complete and un-biased approach.

- Features new content on:

  - Ultra-long haul submarine transmission technologies for telecommunications
  - Alternative submarine cable applications, such as scientific or oil and gas
  - Addresses the development of high-speed networks for multiplying Internet and broadband services with:

    - Coherent optical technology for 100Gbit/s channels or above
    - Wet plant optical networking and configurability
    - Provides a full overview of the evolution of the field conveys the strategic importance of large undersea projects with:

      - Technical and organizational life cycle of a submarine network
      - Upgrades of amplified submarine cables by coherent technology

Contents:

1. Introduction
2. Historical Overview of Submarine Cable Systems
3. Basics of Digital Cable Communication
4. Optical Amplification
5. Ultralong Haul Submarine Transmission
6. Unrepeatered Transmission
7. New Submarine Cable Applications
8. Architectures of Submarine Systems
9. Submarine systems processing
10. Submarine Fibre
11. Transmission mitigation technologies
12. Submerged plant equipment
13. Cable Technology
14. Submarine line terminal
15. System Planning and Deployment
16. Submarine Cable Upgrades
17. Marine and Maintenance

Ordering:  
Order Online - [http://www.researchandmarkets.com/reports/3429190/](http://www.researchandmarkets.com/reports/3429190/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,  
Guinness Centre,  
Taylors Lane,  
Dublin 8,  
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Undersea Fiber Communication Systems. Edition No. 2
Web Address: http://www.researchandmarkets.com/reports/3429190/
Office Code: SCH3LEWI

Product Format
Please select the product format and quantity you require:

<table>
<thead>
<tr>
<th>Quantity</th>
