Residential Robotic Vacuum Cleaner Market in Western Europe 2015-2019

Description:
A robotic vacuum cleaner, also called a robovac, is used to clean floors, gutters, and pools and has the ability to function without human intervention within a defined area. It consists of a mobile base, a docking station, and other accessories that support its smooth functioning. It is autonomous to a high degree and uses intelligent sensory feedback control that is programmed to clean surfaces automatically. A robovac has additional features such as smart navigation, laser vision, room memory, mapping, and a self-emptying function, thus enabling increased efficiency and performance. In addition, it has in-built ledge sensors that allow smoother maneuverability. Residential robotic vacuum cleaners assist in cleaning and ease household chores.

The report forecasts the residential robotic vacuum cleaner market in Western Europe market to grow at a CAGR of 9.02% over the period 2014-2019.
