Geometry with Trigonometry. Edition No. 2

Description: Geometry with Trigonometry Second Edition is a second course in plane Euclidean geometry, second in the sense that many of its basic concepts will have been dealt with at school, less precisely. It gets underway with a large section of pure geometry in Chapters 2 to 5 inclusive, in which many familiar results are efficiently proved, although the logical frame work is not traditional. In Chapter 6 there is a convenient introduction of coordinate geometry in which the only use of angles is to handle the perpendicularity or parallelism of lines. Cartesian equations and parametric equations of a line are developed and there are several applications. In Chapter 7 basic properties of circles are developed, the mid-line of an angle-support, and sensed distances. In the short Chapter 8 there is a treatment of translations, axial symmetries and more generally isometries. In Chapter 9 trigonometry is dealt with in an original way which e.g. allows concepts such as clockwise and anticlockwise to be handled in a way which is not purely visual. By the stage of Chapter 9 we have a context in which calculus can be developed. In Chapter 10 the use of complex numbers as coordinates is introduced and the great conveniences this notation allows are systematically exploited. Many and varied topics are dealt with, including sensed angles, sensed area of a triangle, angles between lines as opposed to angles between co-initial half-lines (duo-angles). In Chapter 11 various convenient methods of proving geometrical results are established, position vectors, areal coordinates, an original concept mobile coordinates. In Chapter 12 trigonometric functions in the context of calculus are treated.

New to this edition:

- The second edition has been comprehensively revised over three years
- Errors have been corrected and some proofs marginally improved
- The substantial difference is that Chapter 11 has been significantly extended, particularly the role of mobile coordinates, and a more thorough account of the material is given

- Provides a modern and coherent exposition of geometry with trigonometry for many audiences across mathematics
- Provides many geometric diagrams for a clear understanding of the text and includes problem exercises for many chapters
- Generalizations of this material, such as to solid euclidean geometry and conic sections, when combined with calculus, would lead to applications in science, engineering, and elsewhere

Contents:

1 Preliminaries

2 Basic shapes of geometry

3 Distance
degree-measure of an angle

4 Congruence of triangles
parallel lines

5 The parallel axiom
Euclidean geometry

6 Cartesian coordinates
applications

7
Circles
their basic properties

8
Translations
axial symmetries
isometries

9
Trigonometry
cosine and sine
addition formulae

10
Complex coordinates
sensed angles
angles between lines

11
Vector and complex-number methods

12
Trigonometric functions in calculus

Appendix A
List of Axioms

Bibliography

Ordering:
Order Online - http://www.researchandmarkets.com/reports/3452023/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

- Product Name: Geometry with Trigonometry. Edition No. 2
- Web Address: http://www.researchandmarkets.com/reports/3452023/
- Office Code: SCBRD4GY

Product Format
Please select the product format and quantity you require:

| Quantity       | Hard Copy (Hard Back): | USD 83 + USD 29 Shipping/Handling |

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

- Title: Mr, Mrs, Dr, Miss, Ms, Prof
- First Name: ____________________________ Last Name: ____________________________
- Email Address: * ____________________________
- Job Title: ____________________________
