Distributed Antenna Systems (DAS) Equipment & Services Market by Coverage (Indoor, Outdoor), Ownership, Vertical (Public Venues, Transportation, Airports, Industrial, Hospitality, Healthcare & Others), and Geography - Forecast to 2020

Description: DAS refers to a network of antennas that enhances the range and capacity of cellular networks inside large facilities such as public venues (stadiums, malls, convention centers, and others), hospitals, hotels, resorts, office buildings, universities, and manufacturing facilities among others. It is also used to provide coverage outdoors in areas where network connectivity is low or cannot be provided by traditional cell towers, such as roadways, parks, oil refineries, and others.

This report provides an in-depth analysis of the global DAS market on the basis of different types of coverage, ownership, verticals, and geography. Different ownership models considered for this study are carrier, neutral host, and enterprise ownership model. The different verticals covered in the report include transportation, airports, industrial, healthcare, public venues, hospitality, enterprises, and higher education.

The report also covers the regulations required to be followed by buildings where DAS deployments are to be done, along with market dynamics, Porter's five forces analysis, and value chain analysis. The DAS market dynamics are categorized under four headers, namely, drivers, restraints, opportunities, and challenges. The market-related forecasts have been done using these market dynamics.

The report also includes the detailed profiles of various companies currently active in this market. In addition to the company profiles, the report also provides the competitive landscape (CL) of the key players in the market. The CL covers market ranking analysis, mergers and acquisitions, collaborations, partnerships, new product developments, and other key growth strategies of each player. The key players covered in this report are AT&T (U.S.), American Tower Corp. (U.S.), Axell Wireless (U.K.), Comba Telecom (China), TE Connectivity (Switzerland), Solid Technologies (South Korea), and CommScope, Inc. (U.S.) among others.
