Waste Paper Management Market by Service & Equipment (Collection & Transportation, Recycling, Incineration, Disposal), Recovery (Containerboard, Newsprint, Tissue), Source (Commercial, Industrial, Residential), Paper Grade - Global Forecast to 2020

Description: The global market for waste paper management has been growing proportionally with the increasing environmental concerns among people and enforcement of stringent environmental laws & regulations.

The paper industry has been dominated by North America for more than a century now. North America is the largest producer as well as consumer of paper & paper products with a yearly per capita consumption of 487 pounds of paper. This region also enjoys significant availability of fiber resources, which enables it to hold the highest position in the global export of pulp & waste paper. The U.S. ranks first in pulp & paper manufacture and exports, globally, followed by Canada. The global waste paper management market is projected to be valued at around USD 43.35 Billion by 2020, and to grow at a CAGR of 2.55% from 2015 to 2020. The commercial sector as a source of waste paper is projected to grow at the highest CAGR from 2015 to 2020.
