India Automotive Bearing Market (2015-2021): Market Forecast by Bearing Types (Ball, Roller and Clutch), Vehicle Types (Two Wheeler, Three Wheeler, Passenger Vehicle, Commercial and OTR Vehicle) and Regions

Description:
India’s automotive sector is all set to revive back after sluggish demand during the period 2012-14. Increasing consumer confidence and recovery of the economy has pushed the market towards positive growth. A similar trend is expected in automotive bearing market, where market would grow over the next six years.

Growing two wheeler sales is primarily driving the demand for ball bearing, wherein deep groove ball bearing leads the market. In the next six years, ball bearing segment to witness higher growth over roller bearing and clutch bearing segments, as a result of growth in two wheeler market.

With the launch of ‘Make in India’ campaign domestic production of automotive vehicles is expected to increase in the forecast period. The initiatives would drive various international players to expand and establish their manufacturing facilities, thus creating huge demand for automotive components in the country. Further, opportunities to export the vehicles in the international market would fuel the market for automotive bearing.
